### PRIMED COLOURS

See inside back cover for details.

### NOTE: PLEASE CHOOSE THE PROFILES CAREFULLY.

**COLONIALS:** The profile is different in each timber. Eg. Craftwood colonial is different to ULTRAprime™ colonial even though they are both MDF.

**EDWARDIAN/LAMBS TONGUE:** Even though they were known as the same profile years ago, we know them as two different profiles.

### TREATED PINE – PRODUCT TREATMENT

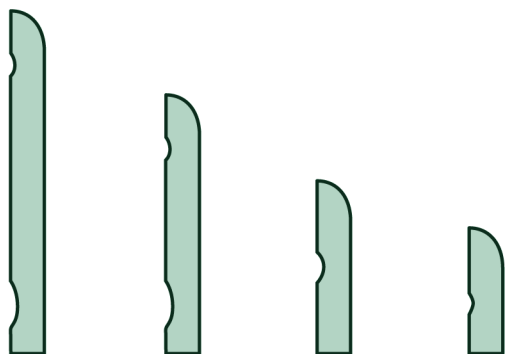

See inside back cover for details.

### SPECIFICATION FOR PAINTING TREATED PINE PRIMED PRODUCTS.

See inside back cover for details.

## WE CAN MANUFACTURE TO ORDER A HUGE VARIETY OF TIMBER MOULDINGS IN A VARIETY OF TIMBER SPECIES.

For volume enquiries, we can also access different timber mouldings manufactured in Victoria, New South Wales, Queensland, Tasmania and New Zealand. All the products in our current range are manufactured at these locations due to the raw material being sourced from there and volume manufacturing.

### **For a full understanding of what is required to get a made to order moulding, please read the following:**

All products in our range of timber mouldings in this brochure are manufactured in what is called a minimum quantity run. As an example some products have a minimum quantity run of say 10,000 metres. In other words all products are produced in the appropriate quantities to minimise the manufacturing costs. Getting a special product made to order is vastly different to this so you need to be aware of the following unless you require a volume run.

- The cost of the made to order cutters for a special timber profile will be at the customers expense.
- A 'set up fee' to dismantle the moulder for the new cutters will be at the customers expense.
- All orders are subject to a minimum quantity. For skirting and architraves 50 metres is the minimum.
- The delivery charge from the manufacturer once the goods are made will be at the customers expense.
- A time frame of between 15 – 20 working days applies but is subject to change.
- GST is applicable on all orders.

### **To quote the made to order moulding we require the following information:**

- A brief description of the made to order moulding you require. E.g. Architrave, Skirting Board, Picture Rail.
- The outside dimensions of the made to order moulding you require. E.g. 125mm x 32mm.
- The timber species you would like the made to order moulding manufactured in. Please note, MDF, Finger Jointed Pine and Victorian Ash are often readily available. Certain furniture type timber species are subject to availability and are often not suitable for timber mouldings due to kiln drying reasons.
- The finish of the made to order moulding for MDF or Finger Jointed Pine. E.g. Primed or Unprimed.

### **To order the special moulding we require the following:**

- An actual sample of the timber moulding you require for the cutters to be made and matched to.
- An official purchase order from the Timber & Hardware store you are purchasing the product from.

### **Conditions**

- The order will not be made without an actual sample of the product required.
- All items made to order are not subject to change once the order is placed with our company.
- Period Timber Mouldings (Aust) Pty Ltd cannot accept any made to order moulding for return.

## PRIMED COLOURS

**Finger Jointed Pine Mouldings—Primed.....White**  
**Finger Jointed Treated Pine Mouldings—Primed ..... Beige**  
**ULTRAprime™ MDF Mouldings Primed.....Light Green**  
**Craftwood MDF Mouldings—Primed .....White**

### NOTE: PLEASE CHOOSE THE PROFILES CAREFULLY.

**COLONIALS:** The profile is different in each timber. Eg. Craftwood colonial is different to ULTRAprime™ colonial even though they are both MDF.

**EDWARDIAN/LAMBS TONGUE:** Even though they were known as the same profile years ago, we know them as two different profiles.

## TREATED PINE – PRODUCT TREATMENT

**Protim Optimum** (Azole – An Organic formulation) protects and preserves timber precisely. Protim fluid is a **clear formulation**. It does not change the natural colouring of the wood. It can be painted, stained, glued or sealed with most commercially available products. Protim Optimum meets the requirements for H3 market (ie. above ground use) as fungicide/insecticide. AUST STD (AS1604) NZ STD (MP 3640).

## SPECIFICATION FOR PAINTING TREATED PINE PRIMED PRODUCTS.

### Keep covered until ready for use.

1. Fill all nail holes with an exterior filler as per manufacturer's directions. Note that some fillers do not require priming before use.
2. Remove surface contamination and wash with clean water.
3. If the primed timber has been exposed to the weather for more than two months, lightly sand to remove any chalking. Prime any bare timber rub through areas with a good quality primer.
4. When using acrylic topcoat, apply two coats of a premium brand acrylic topcoat as per label directions.
5. When using a oil based topcoat, firstly apply a good quality undercoat followed by two coats of a premium brand alkyd topcoat as per label directions.

Notes:

- Resin may bleed from wood in hot, sheltered conditions. To reduce the risk of this occurring it is advisable to paint in light colours and follow the above instructions.
- For a better quality finish it is recommended that a good quality acrylic undercoat is used before topcoating.
